## Update on the New School/Church

1. Interior framing below the pitched roof of the church is done and was inspected on Friday.
2. All joists and trusses have been installed and were inspected on Friday. Roof decking is to begin after the inspection. Expected completion date for installation of the entire roof is mid-February.
3. The block on the south wall was finished on Thursday, completing the exterior structure of the building.
4. Mortar was poured in every third hole of the blocks on Friday. The remaining holes in each block is being filled with foam insulation.
5. The masons began working on the bump-outs on Thursday (a decorative feature of additional block that protrudes from the exterior block to add texture and break up the long, straight walls).
6. A water barrier has been applied to the interior walls of the church to keep out moisture. Two inch foam insulation will be applied to walls followed by framing.
